

The Heavy Hitter

Patent Pending

BHS Assembly

- **Old compression rate of 265 psi/in² : Total compression of coils equaled ~800**
- **New style is about 3 inches less of inconel coil, but more travel per square inch at 310 psi/in².**
- **This is accomplished by adding the bellville washer kit in the cage, giving the spring a total compression rating of 3100 psi/in².**
- **The spring is designed to engage ~70% of the washer pack for total compression**
